EXPERT Q&A

LeAnn Nickelsen,
author

Melissa Dickson,
author

What are the Instructional Cha-Chas?

Quite simply, the Cha-Chas are four steps to effective instructional practices. These steps lead to a high-impact flow of daily planning and instruction. We gathered the results of research in the cognitive and behavioral sciences, as well as evidence-based best practices, and combined them into the four easy-to-remember steps: Chunk it, we teach a bit. Chew it, they think about it. Check it, to see if they know. Change it, to watch them grow!

Why is this book important to student success?

Each step of the Instructional Cha-Chas is easily differentiated to address student needs. When the steps are used consistently, the process can double the speed of student learning. In addition, the strategies offered with each step are engaging, encourage high levels of thinking, and promote student self-regulation and collaboration. The Instructional Cha-Chas are really not a choice—every student deserves them daily.

How will it help educators in their classrooms?

The Instructional Cha-Chas support new teachers just learning to develop lessons, as well as veteran teachers in search of more tools for their teacher toolkit. Part one sets up the classroom dance floor by introducing the formative assessment process and showing how to design daily learning targets with a main formative assessment. Part two helps teachers choreograph their classroom instructional dance: instructing, learning, evaluating, and differentiating.

How is this book unique in the world of instruction and assessment?

Many assessment books offer the theory and research, but our book gives classroom teachers the most important research and the most practical, high-impact strategies. With the Instructional Cha-Chas, teachers will see students who were once one year behind get caught up. It's teacher tested and approved, and schools that embrace it are moving every single kid forward faster—the results are amazing!

Four Steps to Make Learning Stick

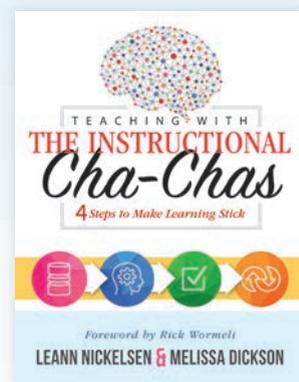

By LeAnn Nickelsen and Melissa Dickson

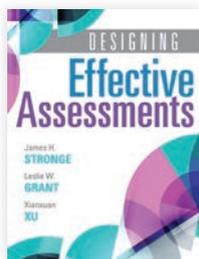

Foreword by Rick Wormeli

Merging educational neuroscience research with formative assessment and differentiated instruction, the authors developed a four-step cycle of instruction—(1) chunk, (2) chew, (3) check, and (4) change—that has the power to double the speed of student learning. Compatible with any subject area, the book's brain-friendly teaching strategies and plentiful tools are designed to help transform students into active learners and independent thinkers.

- Combine brain science with a formative assessment process and differentiated instruction to maximize student learning.
- Examine effective teaching strategies and differentiation practices so you can bump it up or break it down according to student needs.
- Consider the four-step instructional cycle and understand the components of chunk, chew, check, and change.
