

**Creating the Anywhere,
Anytime Classroom**

BOOK STUDY

with Solution Tree

by Dr. Casey Reason

Overview

Dr. Casey Reason has been an innovator in teaching and learning in blended and fully online environments for over 20 years. This three-part book study informs participants regarding the essential elements of virtual learning, including the steps we must take to establish the fundamentals of digital learning, the steps needed in setting up digital learning environments, and finally, strategic approaches to assessment and interventions in digital spaces. Digital and blended-learning environments are providing learners today with unique access points and, if approached strategically, can help achieve the most important outcome of all: outstanding results. Dr. Reason's recent book, *Creating the Anywhere, Anytime Classroom: A Blueprint for Learning Online for grades K–12* is the basis of this training and is perfectly designed for the needs of digital and blended classrooms today.

Monday, August 3

The Fundamentals of Digital Learning

- Is digital learning a convenient alternative or viable tool for expanding learning opportunities like never before?
- What are the digital learning options? (aka: defining cyber synchronous learning, asynchronous learning, and blended learning)

Monday, August 10

Setting Up Engaging Digital Learning

- How can I set up my classroom to allow students to feel welcome and confident as they engage in digital learning experiences?
- What kinds of engaging, welcoming activities help learners get connected and become better prepared for deep and sustaining learning activities?

Monday, August 17

Assessment and Interventions in Digital Spaces

- How can I use digital learning spaces to accurately and efficiently provide formative assessment opportunities for all of my students?
- What are my intervention options in digital learning spaces en route to deeper levels of engagement and sustained learning?
