

FIGURE 14.3:
**Student-Friendly Definitions for
Identify-Analyze-Relate (Problem-Solution)**

Identify: Recognize or point out something in a text

Analyze: Read the text closely to determine its structure

Text: In the classroom, any printed material you are expected to read

Text structure: The way an author decides to organize text

Problem-solution: A type of text structure in which the author defines a problem and presents a solution to that problem

Relate: Make (figure out) a connection between two or more things

Problem: Something that needs to be fixed

Solution: A way to solve a problem
