

Figure 1.3: Intervention Discussion Tool

Directions: Discuss your answers to each question to form a plan for using data from the end of the school year to inform small-group intervention at the beginning of the next school year.

1. What data do you currently collect at the end of the year that give you targeted and specific information to use for small-group intervention learning at the beginning of the next year?
2. What data could you collect at the end of the year (if needed) to give the next grade-level or course educators the information they need to form small groups for intervention at the beginning of the next year?
3. How will you use the data to form the small groups or intervention groups at the beginning of the year?
4. When will you create the small groups or intervention groups for the first day or week of school?
