

Next Steps for Determining Formal Formative Assessments

Analyze current common and individual processes of formal formative assessment for effectiveness and efficiency.

Revise assessment tools as necessary to ensure alignment with the selected essential learning targets.

Create new assessment tools as necessary for any essential learning targets that have not been addressed by formal formative assessment in the past.

When appropriate, create or revise scoring guides to support accurate interpretation of results for students and teachers.

Ensure time is set aside during collaborative team meetings to analyze data.

Take action according to the assessment results for additional support and enrichment.
