Figure 3.9
Collaborative Team Data-Analysis Protocol

Directions: With your collaborative team, answer the following end-of-unit assessment questions.

Team: _____

1. What went well overall in the unit?

2. What do the common end-of-unit data reveal about student performance on the learning standards with which students did well?

3. How did each teacher achieve these student successes?

4. What do the common end-of-unit data reveal about student performance on the learning standards in which students did *not* do well?

5. How well did we provide feedback to our students during the unit on the weak-performing learning standards during the unit?

6. What elements of the unit, including specific lessons, will need to be improved for future use?

7. What will be the impact on our instruction during the next unit based on our reflection on these results? (What will our RTI Tier 1 differentiated response be?)

8. How will our team provide for student re-engagement around learning standards that need more time and focus for student learning? (What will our RTI Tier 2 team response be?)
