

Figure 3.1: Professional Development Categorized by Three Skills

Directions: Write down all the professional development that has been provided to principals over the last six months. Then, place a check mark under the skills taught during that professional development (hard skills, soft skills, or academic skills). After you've finished, reflect on which skills you spend more time teaching and which skills you might not be teaching enough.

Professional Development Provided for Principals	Hard Skills	Soft Skills	Academic Skills
