

Strategies for SMP 5: Use Appropriate Tools Strategically

Identify a content standard students are currently learning or will be learning in the near future. Choose at least two of the Mathematical Practice 5 strategies from the following list to develop the habits of mind in students in order to use appropriate tools strategically. Record your observations in the following chart.

- Modeling and incorporating mathematical tools
 - Introducing a tool
 - Offering student play
 - Reviewing a tool
- Toolbox
 - Number lines
 - Technology

Strategy	How were all students engaged when using the strategy?	What evidence shows the impact on student learning? How do you know?
