Common Formative Assessment: Third Grade Example

Solve each problem. Show your work.

$23 + 47 =$

$72 - 34 =$

Jonah loves to read. Yesterday he read 36 pages and today he read 28.

How many pages did Jonah read in all?

The third grade students at Mountain Meadow School are going on a

field trip. There are 47 students on the bus and 59 waiting to board the

bus. How many more kids are waiting to get on the bus than are already

on the bus?

Problem Solving RUBRIC
Understanding/Strategy/Answer
1 point—I used the important information in the problem
1 point—I used a good strategy to get the answer with labels and equations
1 point—I showed the correct answer
3 points possible
