

Standard 1: Do and Avoid Chart

As you move through the standards for improvement, you will find things to do and things to avoid. After reading the effective and less effective practice examples and reflecting on them and the work of standard 1, complete the following do and avoid chart to help you record your thoughts about the work of this standard.

Instructions: Record what you plan to do and avoid. Consider the following questions.

1. How will you introduce your team to the processes introduced in this chapter?
2. How will you encourage your team to examine data without judgment?
3. How will you facilitate discussions about how to bring an enhanced mindset to the processes?
4. How will you support identifying gaps in performance without jumping to solutions?
5. How will you facilitate analyzing the systemic factors impacting performance without jumping to solutions?

Do	Avoid
