

Standard 7: Do and Avoid Chart

As you move through the standards for improvement, you will find things to do and things to avoid. After reading the effective and less effective practice examples and reflecting on them and the work of standard 7, complete the following do and avoid chart to help you record your thoughts about the work of this standard.

Instructions: Record what you plan to do and avoid. Consider the following questions.

1. How will you introduce your team to the processes introduced in this chapter?
2. How will you facilitate your team to use the SEDA model (see pages 137–138)?
3. How will your team determine whether professional learning or other ways of building capacity are needed?
4. How will your team assess the quality of coaching for capacity building?
5. How will your team evaluate professional learning and the facilitation of transfer to practice?
6. How will your team provide opportunities for reflection?

Do	Avoid
