

Standard 9: Do and Avoid Chart

As you move through the standards for improvement, you will find things to do and things to avoid. After reading the effective and less effective practice examples and reflecting on them and the work of standard 9, complete the following do and avoid chart to help you record your thoughts about the work of this standard.

Instructions: Record what you plan to do and avoid. Consider the following questions.

1. How will you introduce your team to the processes introduced in this chapter?
2. How will you determine and communicate adoption indicators for initiatives?
3. How will you advocate for ways to resolve factors that impact adoption and implementation?
4. How will you ensure efforts are aligned across groups and content areas to avoid any negative impacts of working at cross-purposes?
5. How can you use action research to inform efforts?

Do	Avoid
