

Template for Prioritizing Standards

Directions: Identify your decision-making criteria, and place each criterion in the appropriate column. Consider using the Other column for write-in criteria when the process illuminates that criteria might have been missing from the original list. If desired, assign points to each predetermined criterion based on its value (for example, three points for endurance, two points for leverage, and three points for student needs) as determined by the team. Fill in the standards to discuss, and then work as a team on the document together or distribute it to each team member to fill out prior to the team conversation.

Standards	Team Criteria and Assigned Value						
	Endurance _____ points	Leverage _____ points	Readiness for the Next Level of Learning _____ points	Testing Requirements _____ points	Student Needs _____ points	Other _____ points	Total _____ points
