

## Brainstorm Meaningful Projects

Choose a major topic area you will cover this school year or semester: \_\_\_\_\_

What are some ways you can connect this topic to a broader, meaningful theme with opportunities for students to explore long-term research projects?

How can you turn this into a group project? What is an ideal group size? What are some key roles group members can fill?

What resources can you offer students to help them research their topics, make connections within the community, or engage in service work?
