

# STRATEGY OBSERVATION CHECKLIST

Populate the checklist with the names of the students you are monitoring for strategy use and the strategies you are observing for, along with a shorthand code. For example, if everyone in class has permission to take a walk to the water fountain if they need a movement break, you would add *Water break (W)* on the left. Student-specific strategies go on the right—for example, *Visit counselor (C)*.

When you observe a student using a strategy, record it here, along with any notes about the behavior, such as when it occurred or if the student called on it independently or with support.
