

Template 1: Exploring and Analyzing Different Types of Data

This template can be used to consider data for a cohort, class, or learning area.

Group:			Focus area:																				
<table border="1"> <thead> <tr> <th colspan="3">Assessment 1</th> </tr> <tr> <th>% of students below average</th> <th>% of students at the average</th> <th>% of students above average</th> </tr> </thead> <tbody> <tr> <td></td> <td></td> <td></td> </tr> </tbody> </table>			Assessment 1			% of students below average	% of students at the average	% of students above average				<table border="1"> <thead> <tr> <th colspan="3">Assessment 2</th> </tr> <tr> <th>% of students below average</th> <th>% of students at the average</th> <th>% of students above average</th> </tr> </thead> <tbody> <tr> <td></td> <td></td> <td></td> </tr> </tbody> </table>			Assessment 2			% of students below average	% of students at the average	% of students above average			
Assessment 1																							
% of students below average	% of students at the average	% of students above average																					
Assessment 2																							
% of students below average	% of students at the average	% of students above average																					
<table border="1"> <thead> <tr> <th colspan="3">Assessment 3</th> </tr> <tr> <th>% of students below average</th> <th>% of students at the average</th> <th>% of students above average</th> </tr> </thead> <tbody> <tr> <td></td> <td></td> <td></td> </tr> </tbody> </table>			Assessment 3			% of students below average	% of students at the average	% of students above average				Things I notice about the data:											
Assessment 3																							
% of students below average	% of students at the average	% of students above average																					
Things I wonder about the data:			Questions I have about the data:																				
Specific steps for modifying teaching/programs/approaches:
