

Data Analysis Form

Directions: Regardless of the collection tools you decide to employ, this data analysis form will help guide your team’s planning through the interpretation of information collected. The first row is completed with sample details from a district determining whether to conduct instruction in person, hybrid, or fully online for the following school year. The remaining rows are blank to input your own distinct endeavors.

Initiative	Desired Input	Metrics	Collection Procedure	Sample Size	Results	Interpretation
Distance and Digital Instructional Delivery Model	Input from parents and students on in-person, hybrid, or distance learning instruction	Less than 50 percent of survey respondents in agreement	Google Forms Hard copy surveys sent via email	8,950	25 percent in-person; 43 percent hybrid; 32 percent fully online	75 percent want hybrid or online only; create options for both; no in-person at this time
