Chapter 14 Essential Questions

As you reflect on this chapter, consider the following questions.

- Reflect on the existing Tech School, with its initial forward-looking design that still can't keep pace to sustain learning for the 21st century: Do we realize the tenets of the elements of schooling within our proposed changes to its pods and central library?

- How does the spatial configuration of your school reflect or support your current thinking about the use of digital technology for teaching and learning?

- Can your district modify your school building to easily, quickly, and economically support inevitable changes in instruction and technology?

- How long has your school been in its current spatial configuration? Has the world outside your schools changed appreciably during this period?

- With advances in technology, with new entities creating teaching and learning materials, with ongoing pressures on the costs of schooling, and with concerns about the competitiveness of our schools, is it likely that your school will need to change repeatedly in the coming years?
