

Compare Your Notes

Chapter 11

In a collaborative team or with a colleague, complete the following tasks.

1. Talk to your colleagues about an imminent change within your organization. How will you use your knowledge of instructional frameworks and of the change process as outlined in this chapter to facilitate that change?
2. Who might be on the pilot or demonstration team going first in implementing the change? Who will require more support later in the change process in order to eventually change?
