

Figure 2.8: Protocol for Mathematics Vocabulary and Notations

Directions: Determine the order students will learn key vocabulary and notations listed in the team protocol to unwrap and make sense of mathematics standards in figure 2.4. As a team, identify academic mathematics vocabulary words students will learn in the unit and clarify each word with the definition, an explanation, a drawing, or an example. Similarly, identify any mathematics notations students will learn, and clarify how to read and pronounce the symbols. Provide an example for how to use each notation mathematically in the unit.

Unit:		
Vocabulary	Definition, Explanation, Drawing, or Example	
Notation	Words to Show How to Read the Notation	Example Showing How to Use the Notation in the Unit
