Use this assessment to screen for students who might be at risk and to monitor the progress of students receiving supplemental supports. Administer the assessment orally one on one by asking the student to state the numeral that represents the number of dots in each box; or, administer the assessment in writing to a group by asking students to write the numeral that represents the number of dots in the box. (Administration depends on student age and readiness.) Students should be given one minute to complete the assessment.
