

## Chapter 6: Ride the Wave, Strategy 5

If you could solve or address one problem on your campus, what would it be? Take the following five steps to fill out the corresponding table and create an action plan for solving that problem.

1. List who you would have to consult or enlist the help of to solve this problem.  
Depending on the size of the project, this might be a long list.
2. List the resources that would be necessary to develop and implement an actionable strategy for success.
3. List the obstacles that have prevented the problem from already being solved.
4. Brainstorm and list some ways to overcome those obstacles.
5. List the steps you will take to put a plan into action.
