

## Exercise: Determine Skills

Using your team’s unwrapped, annotated standards and knowledge items, collaborate on determining skills and enter them on your work-in-progress PREP template.

Use the following questions to guide this exercise.

- What individual skills are embedded within the full learning standard? What must students be able to do to master the entire learning standard?

- Are the verbs used to define each skill measurable? Do they match the rigor of the standard?

- Do the skills have transfer value (leverage), or are the skills anchored to specific content?
