

The Professional Learning Communities at Work™ Continuum: Focusing on Results (Part II)

DIRECTIONS: Individually, silently, and *honestly* assess the current reality of your school's implementation of each indicator listed in the left column. Consider what evidence or anecdotes support your assessment. This form may also be used to assess district or team implementation.

Individuals, teams, and schools seek relevant data and information and use it to promote continuous improvement.

Indicator	Pre-Initiating	Initiating	Implementing	Developing	Sustaining
Collaborative teams of teachers regard ongoing analysis of evidence of student learning as a critical element in the teaching and learning process. Teachers are provided with frequent and timely information regarding the achievement of their students. They use that information to: ■ Respond to students who are experiencing difficulty ■ Enrich and extend the learning of students who are proficient ■ Inform and improve the individual and collective practice of members ■ Identify team professional development needs ■ Measure progress toward team goals	The only process for monitoring student learning is the individual classroom teacher and annual state, provincial, or national assessments. Assessment results are used primarily to report on student progress rather than to improve professional practice. Teachers fall into a predictable pattern: they teach, they test, they hope for the best, and then they move on to the next unit.	The district has created benchmark assessments that are administered several times throughout the year. There is often considerable lag time before teachers receive the results. Most teachers pay little attention to the results. They regard the assessment as perhaps beneficial to the district but of little use to them. Principals are encouraged to review the results of state assessments with staff, but the fact that the results aren't available until months after the assessment and the lack of specificity mean they are of little use in helping teachers improve their practice.	Teams have been asked to create and administer common formative assessments and to analyze the results together. Many teachers are reluctant to share individual teacher results and want the analysis to focus on the aggregate performance of the group. Some use the results to identify questions that caused students difficulty so they can eliminate the questions. Many teams are not yet using the analysis of results to inform or improve professional practice.	The school has created a specific process to bring teachers together multiple times throughout the year to analyze results from team-developed common assessments, district assessments, and state or provincial and national assessments. Teams use the results to identify areas of concern and to discuss strategies for improving the results.	Teachers are hungry for information on student learning. All throughout the year, each member of a collaborative team receives information that illustrates the success of his or her students in achieving an agreed-upon essential standard on team-developed common assessments he or she helped create, in comparison to all the students attempting to achieve that same standard. Teachers use the results to identify the strengths and weaknesses in their individual practice, to learn from one another, to identify areas of curriculum proving problematic for students, to improve their collective capacity to help all students learn, and to identify students in need of intervention or enrichment. They also analyze results from district, state or provincial, and national assessments and use them to validate their team assessments.
