

Team Response for Common Formative Assessment

After implementing and analyzing a common formative assessment, the team identifies students who need additional time and support, students who are on target (demonstrate minimal mastery), and students who need extension (demonstrate strong mastery and beyond). Agree on an instructional activity for each group. Share lesson-plan outlines and materials with all team members.

Essential standard:		
Need Additional Time and Support	On Target	Need Extension
Students:	Students:	Students:
