

Action Steps—Chapter 5

Consider taking the following action steps to incorporate project-based learning and civics education into the school program.

- Review figure 5.3 (page 146), which provides examples of how to organize different types of projects through the four phases of instruction. Develop a project plan organized around the four phases and one of the exemplary project-based models in figure 5.3.
- Consider the following questions and summarize what you have learned and better understand about civics education.
 - ◇ What are the key points or big ideas that you learned from the civics education section?
 - ◇ What questions or concerns do you still have?
 - ◇ What action plans would you create for improving teaching and learning?
